L. 95–541), as amended by the Antarctic Science, Tourism and Conservation Act of 1996, has developed regulations for the establishment of a permit system for various activities in Antarctica and designation of certain animals and certain geographic areas requiring special protection. The regulations establish such a permit system to designate Antarctic Specially Protected Areas.

Application Details

1. Applicant Permit Application: 2015–013; Dr. Sarah Eppley, Portland State University, Department of Biology, P.O. Box 751, Portland, OR 97207.

Activity for Which Permit Is Requested

ASPA. Import into USA. Mosses are known ecosystem engineers in the Arctic tundra, while little is known about Antarctic mosses in organizing communities or shaping ecosystem processes, and how individual moss types influence Antarctic ecology. The applicants propose to collect moss and soil samples from ASPAs to investigate how climate warming will affect Antarctic moss terrestrial ecosystems. Moss samples will be taken using a metal 2 cubic centimeter coring device, and soil samples will be collected at up to 3 cm deep. Up to 180 samples total from each of 6 different species and 30 samples total from two other species will be taken, along with up to 400 total soil samples. These samples will be imported back to Portland State University.

Location

ASPA s 125 (Filides Peninsula), 126 (Byers Peninsular), 140 (Crater Lake), 150 (Ardy Island).
