

NASA eClips Demonstrates Importance of Nondestructive Evaluation at Jane H. Bryan Elementary School in Hampton, VA

On Thursday, May 3, 2018 Betsy McAllister, a member of the NASA eClips team, judged the school's annual science fair and engaged families in a hands-on demonstration illustrating the importance of Nondestructive Evaluation (NDE) using the *NASA eClips Guide Lites* resource, *Testing... 1, 2, 3... Testing*.

Over 110 participants learned about the contributions NASA has made in the field of Nondestructive Evaluation to ensure the early detection of flaws that can prevent severe damage to a component, eliminate inefficiency or failure of a system, as well as guard against injury.
