

# NASA eClips™ Releases New Videos About Asteroids for Middle School Students

May 14, 2019

These videos teach about asteroids and comets and the role they play in our Solar System. Audiences learn how the NASA mission, OSIRIS-REx gathered a sample of the asteroid Bennu to study to learn more about the formation of the Solar System.

NASA eClips Real World video segments inspire and engage students, helping them connect mathematics to 21<sup>st</sup> century careers and innovations.
