

GLOBE Mission EARTH and NASA Glenn at Mars, Stars and More Event

GLOBE Mission EARTH participated in the Challenger Learning Center of Lake Erie West's event, Mars, Stars and More! featuring NASA Glenn outreach program on Friday, September 16. Over 500 fourth graders from eight elementary schools learned about the GLOBE Program and how to identify clouds sponsored by GLOBE Mission EARTH. NASA Glenn's activities included some of the following: Make-It, Take-It Activities, Demonstration Carts and Photo Booth.

This event showcases just one of our efforts to strengthen our community relationships, engage audiences in GLOBE and NASA's missions and educate learners on the value of science, technology, engineering and mathematics (STEM).
