The Census Bureau has also added information about the Cybersecurity Enhancement Act of 2015 and Einstein 3A to the BJS Data Protection Guidelines to provide more details to interested respondents about the new cybersecurity monitoring requirements. The following text has been added to Section V. Information System Security and Privacy Requirements: “The Cybersecurity Enhancement Act of 2015 (codified in relevant part at 6 U.S.C. 151) required the Department of Homeland Security (DHS) to provide cybersecurity protection for federal civilian agency information technology systems and to conduct cybersecurity screening of the Internet traffic going in and out of these systems to look for viruses, malware, and other cybersecurity threats. DHS has implemented this requirement by instituting procedures such that, if a potentially malicious malware signature were found, the Internet packets that contain the malware signature would be further inspected, pursuant to any required legal process, to identify and mitigate the cybersecurity threat. In accordance with the Act’s provisions, DHS conducts these cybersecurity screening activities solely to protect federal information and information systems from cybersecurity risks. To comply with the Act’s requirements and to increase the protection of information from cybersecurity threats, OJP facilitates, through the DOJ Trusted Internet Connection and DHS’s EINSTEIN 3A system, the inspection of all information transmitted to and from OJP systems including, but not limited to, respondent data collected and maintained by BJS.”

The Census Bureau collects data on behalf of BJS for BJS’s National Crime Victimization Survey (NCVS) and its supplements. These collections are protected under Title 13 U.S.C. 9. The Census Bureau issued a Federal Register notice (FRN) to revise its confidentiality pledge language to address the new cybersecurity screening requirements (new line bolded for reference only): “The U.S. Census Bureau is required by law to protect your information. The Census Bureau is not permitted to publicly release your responses in a way that could identify you. Per the Federal Cybersecurity Enhancement Act of 2015, your data are protected from cybersecurity risks through screening of the systems that transmit your data.”

The following listing includes the BJS information collections that are administered by the Census Bureau whose confidentiality pledge will be revised.
