NASA’s Universe of Learning provides resources and experiences that enable youth, families, and lifelong learners to explore fundamental questions in science, experience how science is done, and discover the universe for themselves.

NASA’s Universe of Learning is a STEM Learning and Literacy program that:
• provides a direct connection to all NASA Astrophysics science
• uses a spectrum of ways to engage subject matter experts
• integrates mission discoveries and milestones from the past, present, and future into learning programs in a timely manner

Advance SMD Objectives:
• Enable STEM learning
• Improve scientific literacy
• Advance national education goals
• Leverage through partnerships

NASA’s Universe of Learning is a learning pathway that:
• promotes STEM learning
• engages educators and learners in NASA’s Astrophysics science
• provides a variety of resources and materials for informal and formal learning environments
• supports community-based initiatives and programs

NASA’s Universe of Learning provides a rich and diverse set of resources for educators and learners of all ages, offering opportunities to explore the mysteries of the universe and understand the processes that shape our world.
