

WFIRST

Wide Field Infrared Survey Telescope

Determining our origins
Discerning our fate
Discovering new worlds

WFIRST will teach us about the nature of the universe, how it is growing and expanding, how its galaxies coalesced, and its ultimate

WFIRST will conduct a definitive measurement of dark energy and dark matter.

www.nasa.gov

WFIRST will complete the census of exoplanets, finding planets around other stars at distances similar to what is found in our own solar system.
