

Information Technology Infrastructure Committee (ITIC)

*Briefing to the
Astrophysics Science Subcommittee*

November 2012

Larry Smarr
Chair ITIC

ITIC Committee Members

Membership

- *Dr. Larry Smarr (Chair), Director- California Institute of Telecommunications and Information Technology, UC San Diego*
- *Dr. Charles Holmes (Vice-Chair), Retired- NASA HQ Heliophysics Program*
- *Mr. Alan Paller, Research Director- SANS Institute*
- *Dr. Robert Grossman, Professor- University of Chicago*
- *Dr. Alexander Szalay, Professor- Johns Hopkins University*
- -----

New Members

- *Dr. Mark Boster; President-ImpaQ Solutions, LLC*
- *Hon. Mark Forman, former associate director of IT and e-government, OMB*
- *Mr. Joel Mambretti, Director, Intl. Center for Advanced Internet Research, NW Univ.*
- *Dr. Ed Lazowska, Gates Professor & Chair , Dept of Computer Science, UWash*
- *Dr. Pete Beckman, Dir., Exascale Technology and Computing Institute, Argonne NL*
- *Mr. John Muratore, former NASA engineer & Program Manager, now with Space X*

- *Mr. Jason Gillis (Exec Sec), Special Assist. to CIO, NASA*

NAC Committee on IT Infrastructure

DRAFT* Recommendation #2 [March 2012]

- ◆ **Recommendation:** NASA should formally review the existing national data cyberinfrastructure supporting access to data repositories for NASA SMD missions. A comparison with best-of-breed practices within NASA and at other Federal agencies should be made.
- ◆ We request a briefing on this review to a joint meeting of the NAC IT Infrastructure, Science, and Education committees within one year of this recommendation. The briefing should contain recommendations for a NASA data-intensive cyberinfrastructure to support science discovery by both mission teams, remote researchers, and for education and public outreach appropriate to the growth driven by current and future SMD missions.

* To be completed after a joint meeting of ITIC, Science, and Education Committees in July 2012 and the final recommendation submitted to July 2012 NAC meeting

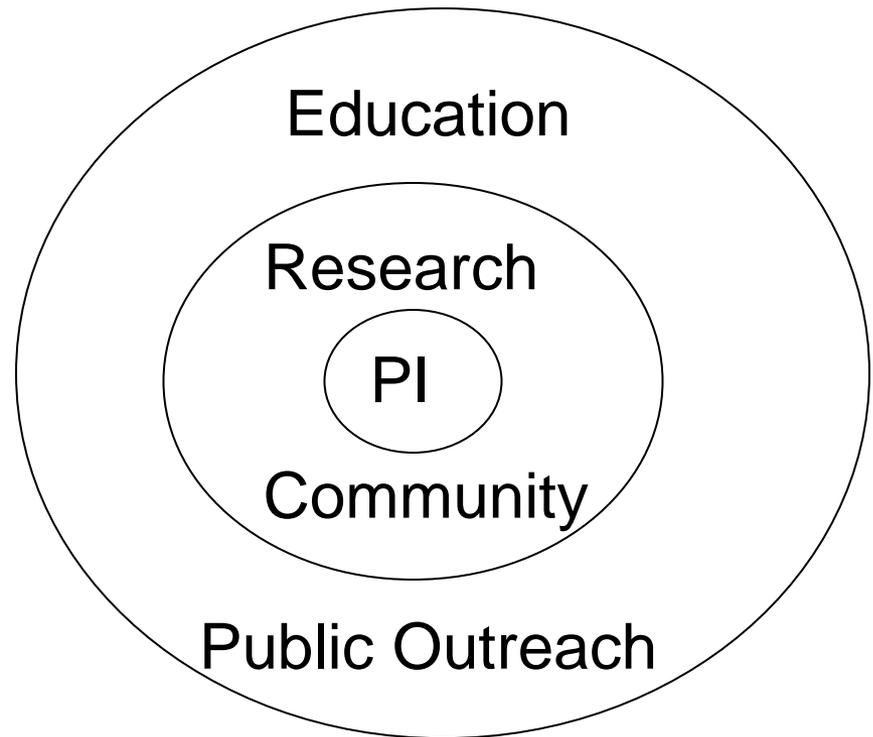

Good Progress, Stay Tuned for Next NAC Meeting

ITIC Finding

◆ SMD Data Resides in a Highly Distributed Servers

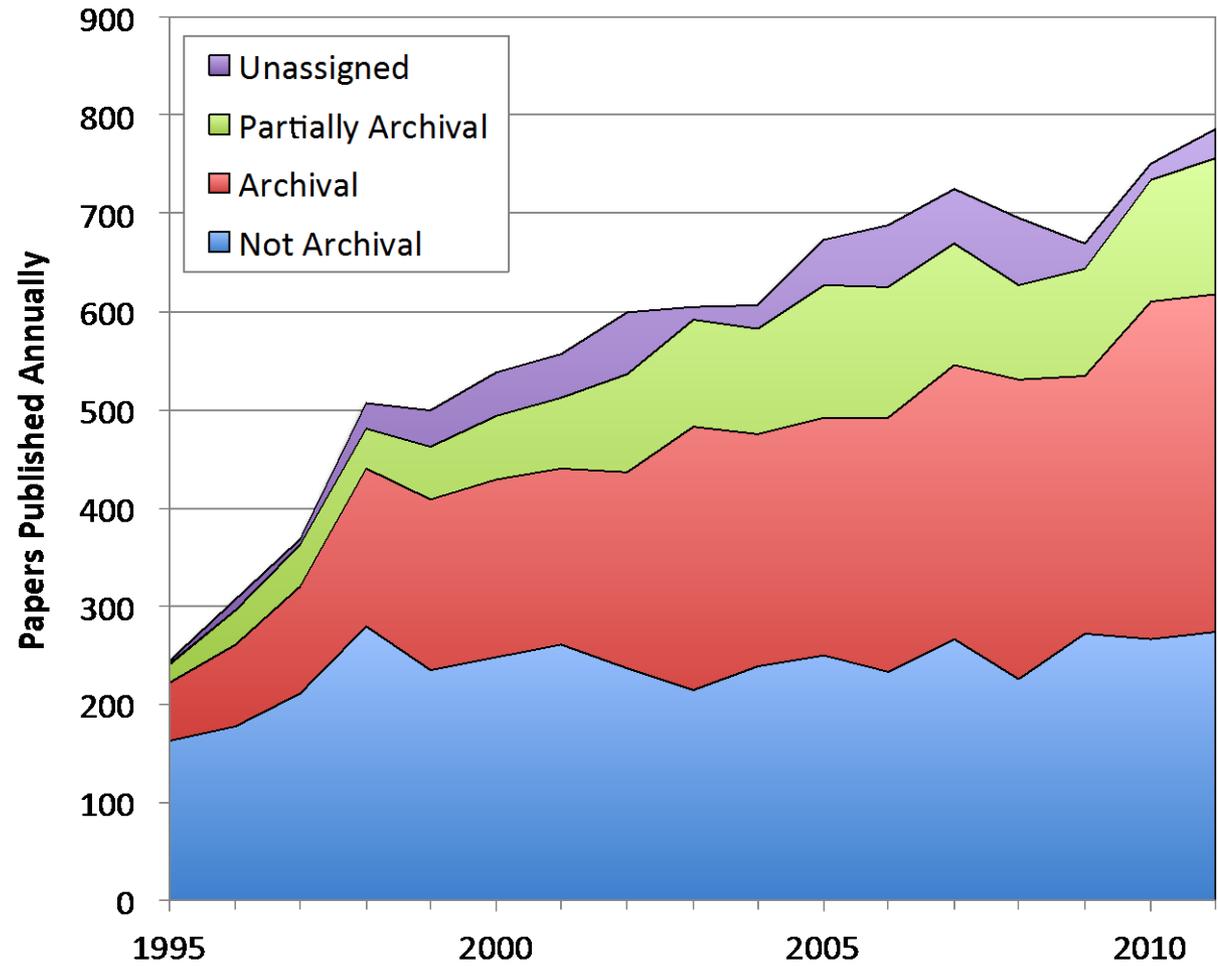

- Many Data Storage and Analysis Sites Are Outside NASA Centers
- Access to Entire Research Community Essential
 - Over Half Science Publications are From Using Data Archives
 - Secondary Storage Needed in Cloud with High Bandwidth and User Portal
- Education and Public Outreach of Data Rapidly Expanding
 - Images for Public Relations
 - Apps for Smart Phones
 - Crowdsourcing

Majority of Hubble Space Telescope Scientific Publications Come From Data Archives

In 2011 there were over 1060 papers written using data archived at MAST

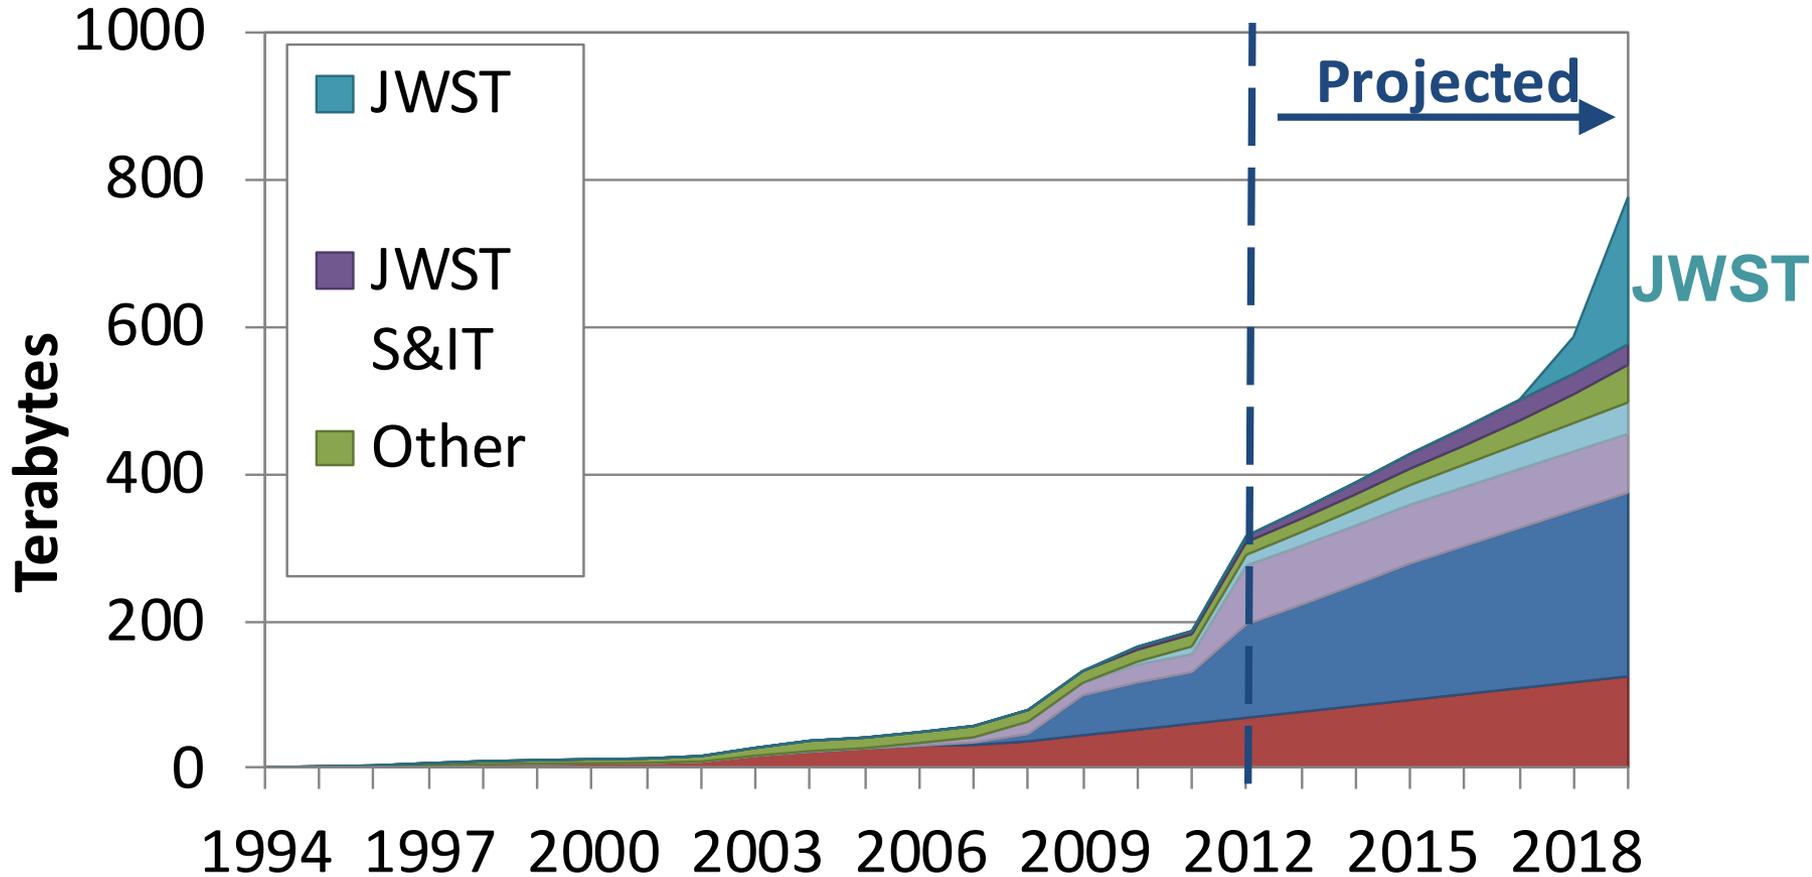

MAST Multimission Archive at Space Telescope

Multi-Mission Data Archives at STSI Will Continue to Grow - Doubling by 2018

Cumulative Petabyte Over 20 Years

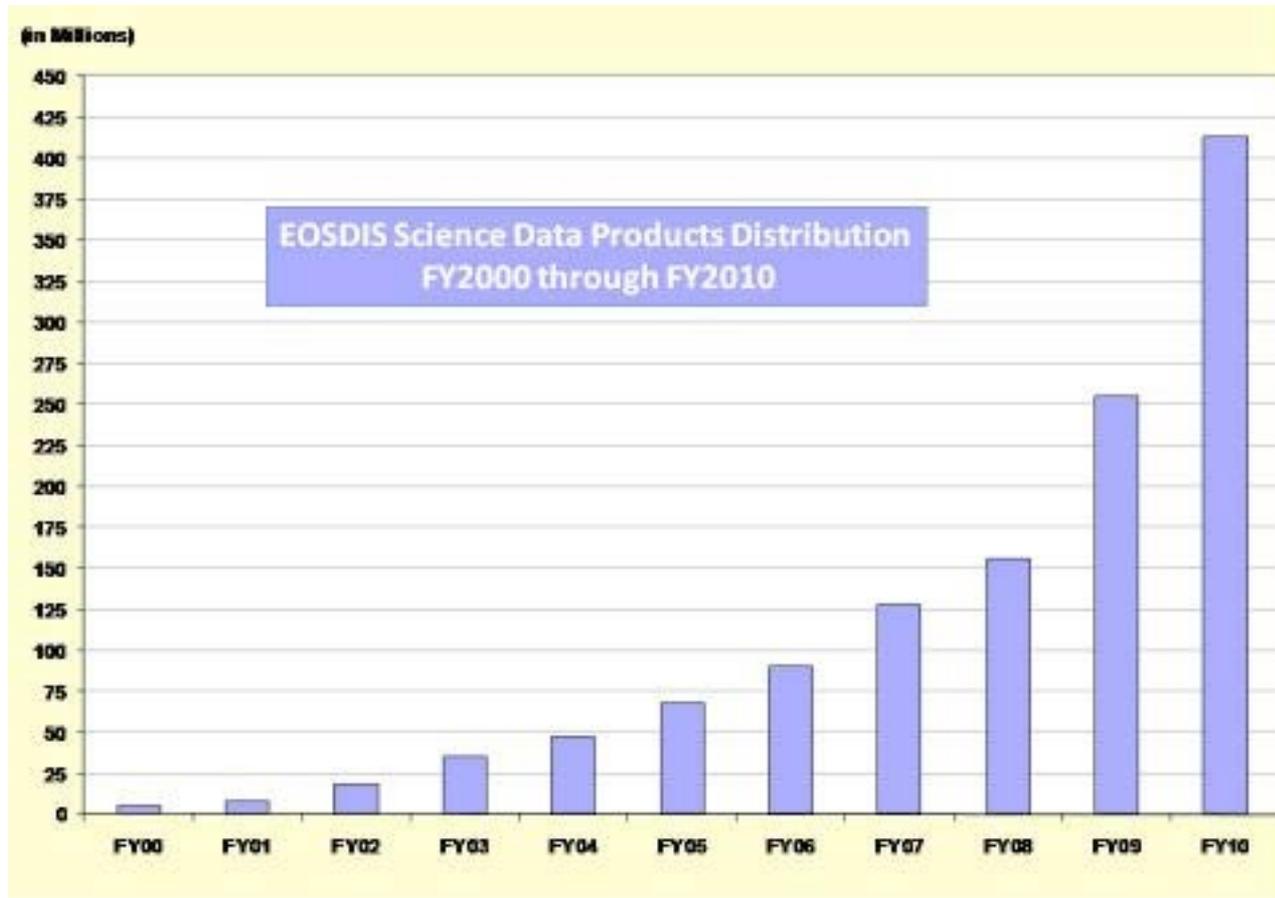

MAST Multimission Archive at Space Telescope

MAST Overview for NAC ITIC March 6, 2012

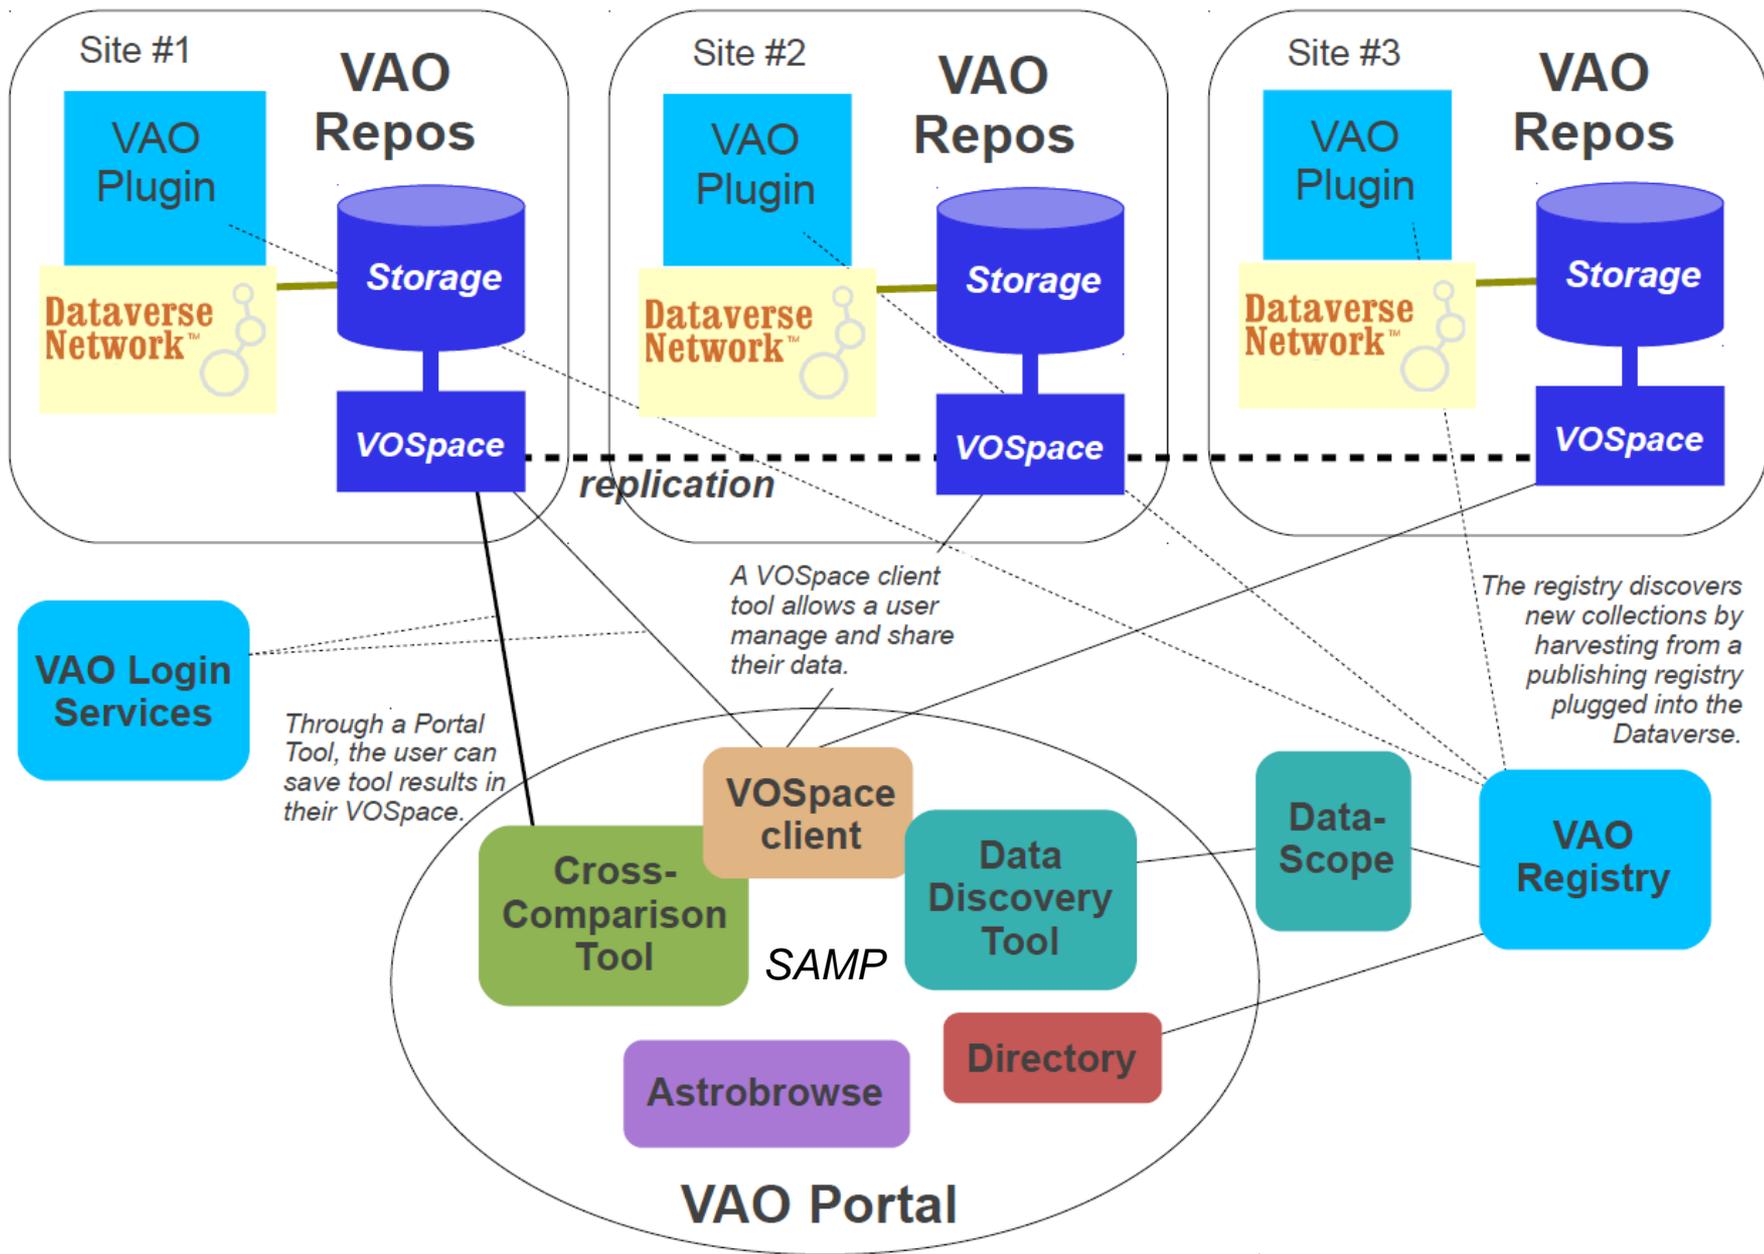

EOS-DIS Data Products Distribution Approaching 1/2 Billion/Year!

The Virtual Observatory

- ◆ The VO is foremost a data discovery, access, and integration facility
- ◆ International collaboration on metadata standards, data models, and protocols
 - Image, spectrum, time series data
 - Catalogs, databases
 - Transient event notices
 - Software and services
 - Distributed computing (authentication, process management)
 - Application inter-communication
- ◆ International Virtual Observatory Alliance established in 2001, patterned on WorldWideWeb Consortium (W3C)

NASA Space Images Are Widely Viewed by Public

Dark Matter Blob Should Not Exist, But There It Is

New Hubble observations puzzle astronomers.

Crowdsourcing Science: Galaxy Zoo and Moon Zoo Bring the Public into Scientific Discovery

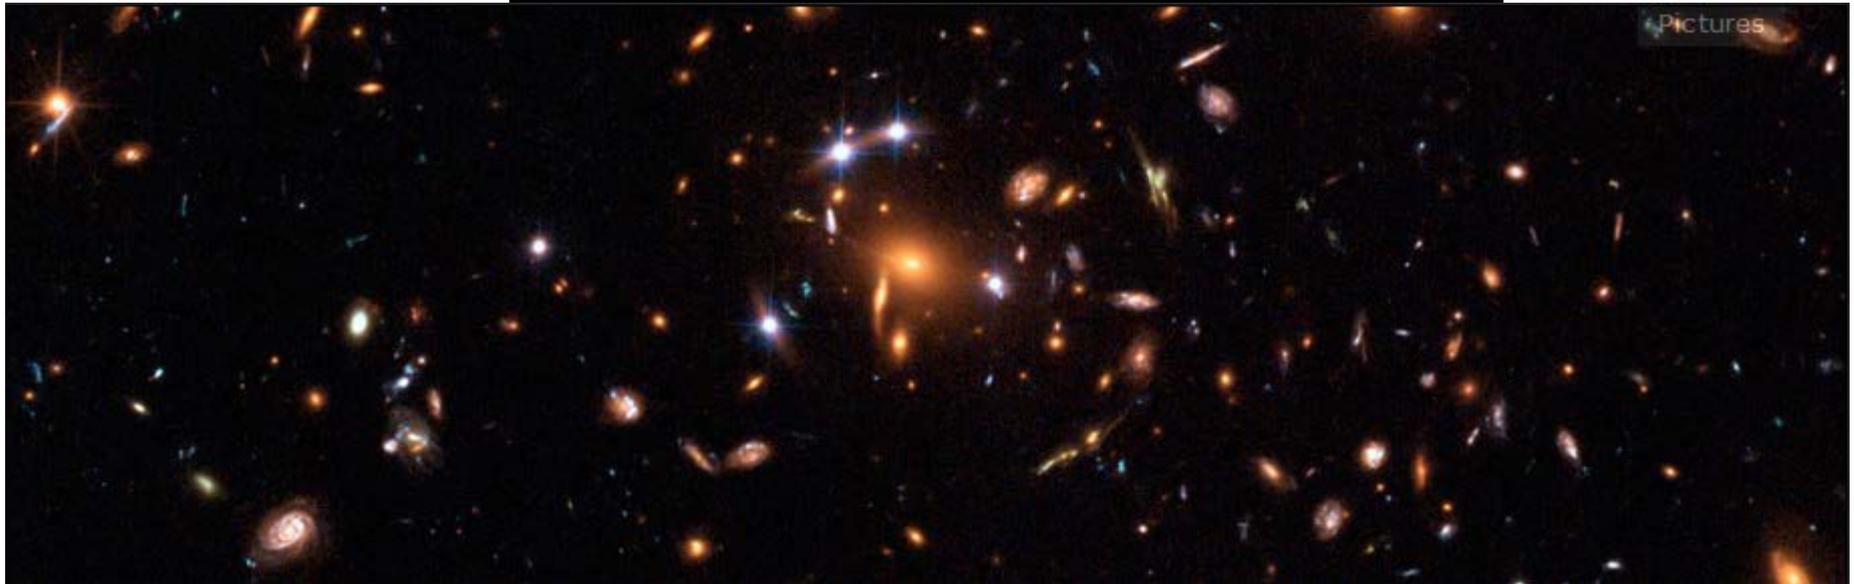

EN · Galaxy Zoo is a ZOO NIVERSE project

...just like MOON ZOO

GALAXY ZOO

HUBBLE

Welcome to Galaxy Zoo, where you can help astronomers explore the Universe

More than 250,000 people have taken part in Galaxy Zoo so far. In the 14 months the site was up Galaxy Zoo 2 users helped us make over 60,000,000 classifications. Over the past year, volunteers from the original Galaxy Zoo project created the world's largest database of galaxy shapes.

Committee Concern: NASA and White House Big Data Initiative

The screenshot shows the White House website header with the text "the WHITE HOUSE PRESIDENT BARACK OBAMA" and a search bar. The main navigation bar includes links for "BLOG", "PHOTOS & VIDEO", "BRIEFING ROOM", "ISSUES", "the ADMINISTRATION", "the WHITE HOUSE", and "our GOVERNMENT". The page title is "Office of Science and Technology Policy". A secondary navigation bar lists "About OSTP", "OSTP Blog", "Pressroom", "Divisions", "R&D Budgets", "Resource Library", "NSTC", "PCAST", and "Contact Us". The article title "Big Data is a Big Deal" is displayed in a large, dark red font, with a "Subscribe" button to its right. A green button labeled "GIVE FEEDBACK ABOUT THIS PAGE" is located in the bottom right corner of the article header area.
